Disclosures to be made to the stock exchange

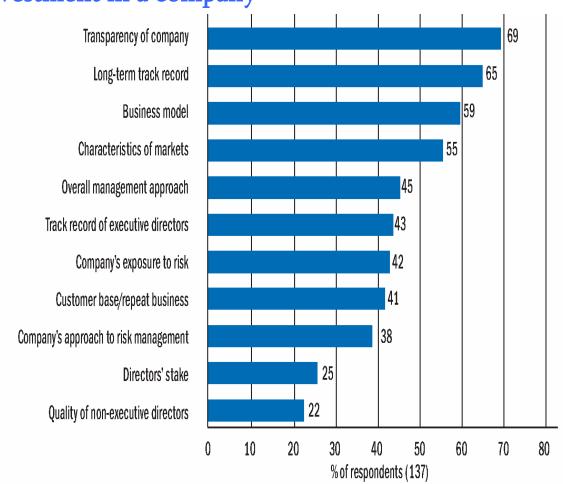

<u>Particulars</u>	<u>Clause</u>
Quarterly results	C49 IV (G)
Quarterly compliance report on Clause 49	C49 VI

What do global investors expect

Transparency is prioritized as the most important factor when making an initial investment in a company

Transparency = information

Transparency = attitude

What do global investors expect

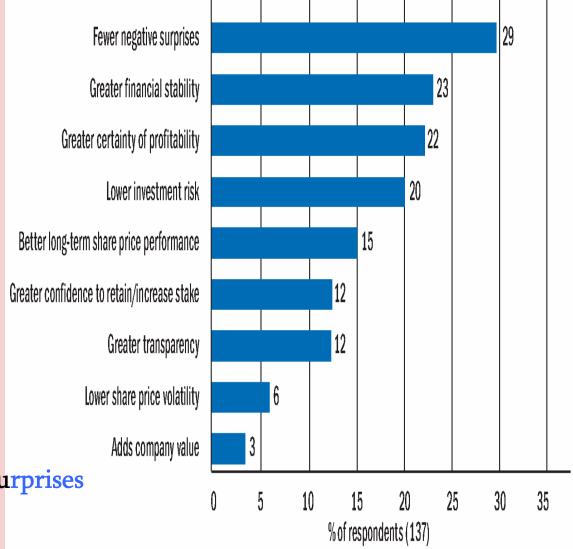

Quantity \(\psi \) Quality

....investors need better information

What do global investors expect

Better risk management = lesser surprises

Improvement in the quality of information to shareholders

How relevant is some of the information that goes to shareholders?

Improvement in the quality of independent directors

Strengthen the implementation mechanism

Its not the introduction of the law which ensures transparency, but the implementation of it

Consequences for non compliance

Need for implementation guidance

Successful implementation of any regulation needs continuous oxygen of implementation guidance

Impact on share prices

Investors apply a penalty when they consider risk management to be insufficient

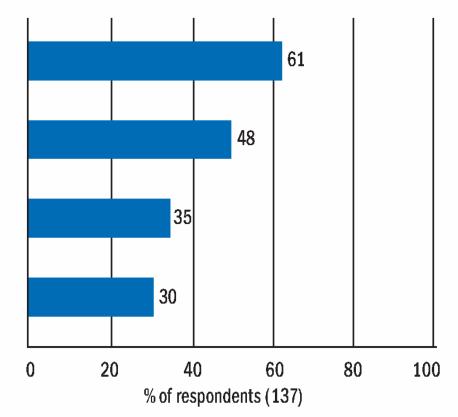

Have there been any instances you can recall where you, as a major investor have...?

Not made investment because risk management insufficient

De-invested because risk management insufficient

Exerted a possible impact on risk management procedures

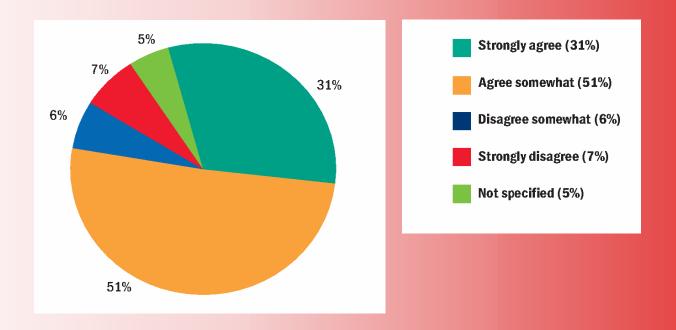

Pushed for changes in senior management because of risk management failings

Impact on share prices

Large investors believe that good risk management is worth a premium price

Do you agree or disagree with a view that it is worth paying a premium for companies that can demonstrate a successful approach to risk management?

Control of MIS and disclosure for outsiders

- **→** Speed of reliable information is the need of investors today
- Sood software support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

 □ The support and a strong FSCP is the backbone of reliable reporting

- Information to be measured before it is shared
- **№** Reliable forecasting processes
- ■ Generating consolidated information is the real challenge.

Impact on ratings

Does a good corporate governance have a positive impact on ratings?

- Would never be the sole determinant of a rating, but can have enhancing effect
- → Trend of Corporate Governance ratings and also of General Company ratings

Training for better disclosure and transparency

Training is the need of current times due to increasing attrition

Companies are running the tight rope of demanding expectations v/s reducing quality of manpower

Focussed training on specific skills is a must

Lack of Training= Higher Risk = May Lower Quality of Governance
