Overview

Contemporary corporate world across the world is in the process of adopting a **moral identity**. The new and emerging concepts of corporate governance, business ethics and corporate social responsibility are some of the footprints of its **ethical evolution**.

However, for the outer conduct and behaviour to be authentic, sincere and effective, it has to be a spontaneous expression of a corresponding **inner state of consciousness**.

This workshop explores the concept and practice of **corporate governance in an integral and holistic consciousness perspective**.

The ideal of corporate governance is to create a corporate consciousness aligned to a strong foundation of self-governance.

Objectives

The participants can **understand and practice the basic concepts** of Governance through Consciousness.

They can **implement the concepts in their day-to-day working life** to deal effectively in situations of stress, strain and indecisions.

To explore a more **inward and integral approach to contemporary business** based on the principle of growth of consciousness.
